the rules presented in this volume of principles of european law deal with service contracts the economic importance of service contracts within the european union is enormous the european commission recently estimated that services account for some 50 of eu gdp and for some 60 of employment in the union though an exact figure is hard to determine given that many services are provided by manufacturers of goods according to the european commission many services appear in official statistics as manufacturing activity meaning that the role of services in the economy is often significantly underestimated

many mathematical statistics texts are heavily oriented toward a rigorous mathematical development of probability and statistics without much attention paid to how statistics is actually used in contrast modern mathematical statistics with applications second edition strikes a balance between mathematical foundations and statistical practice in keeping with the recommendation that every math student should study statistics and probability with an emphasis on data analysis accomplished authors jay devore and kenneth berk make statistical concepts and methods clear and relevant through careful explanations and a broad range of applications involving real data the main focus of the book is on presenting and illustrating methods of inferential statistics that are useful in research it begins with a chapter on descriptive statistics that immediately exposes the reader to real data the next six chapters develop the probability material that bridges the gap between descriptive and inferential statistics point estimation inferences based on statistical intervals and hypothesis testing are then introduced in the next three chapters the remainder of the book explores the use of this methodology in a variety of more complex settings this edition includes a plethora of new exercises a number of which are similar to what would be encountered on the actuarial exams that cover probability and statistics representative applications include investigating whether the average tip percentage in a particular restaurant exceeds the standard 15 considering whether the flavor and aroma of champagne are affected by bottle temperature or type of pour modeling the relationship between college graduation rate and average sat score and assessing the likelihood of o ring failure in space shuttle launches as related to launch temperature

this updated and revised first course textbook in applied probability provides a contemporary and lively post calculus introduction to the subject of probability the exposition reflects a desirable balance between fundamental theory and many applications involving a broad range of real problem scenarios it is intended to appeal to a wide audience including mathematics and statistics majors prospective engineers and scientists and those business and social science majors interested in the quantitative aspects of their disciplines the textbook contains enough material for a year long course though many instructors will use it for a single term one semester or one quarter as such three course syllabi with expanded course outlines are now available for download on the book s page on the springer website a one term course would cover material in the core chapters 1 4 supplemented by selections from one or more of the remaining chapters on statistical inference ch 5 markov chains ch 6 stochastic processes ch 7 and signal processing ch 8 available exclusively online and specifically designed for electrical and computer engineers making the book suitable for a one term class on random signals and noise for a year long course core chapters 1 4 are accessible to those who have taken a year of univariate differential and integral calculus matrix algebra multivariate calculus and engineering mathematics are needed for the latter more advanced chapters at the heart of the textbook s pedagogy are 1 100 applied exercises ranging from straightforward to reasonably challenging roughly 700 exercises in the first four core chapters alone a self contained textbook of problems introducing basic theoretical knowledge necessary for solving problems and illustrating how to solve the problems at hand in r and matlab including code so that students can create simulations new to this edition updated and re worked recommended coverage for instructors detailing which courses should use the textbook and how to utilize different sections for various objectives and time constraints extended and revised instructions and solutions to problem sets overhaul of section 7 7 on continuous time markov chains supplementary materials include three sample syllabi and updated solutions manuals for both instructors and students

service in this book refers to the behaviors and actions of serving customers selling in this book refers to the behaviors and actions of selling products to customers hence this book is completely different from other books on these subjects despite the fact

that there are many books on service improvement and many related to selling skills worldwide there are few books on how service and selling are integrated and coordinated primarily it focuses on the interaction and transition between the behavior of service and the behavior of selling by sharing methods and skills of how those two are interrelated this book provides many helpful guidelines and solutions for turning customers satisfaction with service into growth in sales through many refreshing ideas the author helps you deeply understand the significance of integration of and conversion between service and selling and the harm of disconnection between service and selling many new ideas and viewpoints which are different from other service books or sales books are discussed such as the contention that over service and over selling should be prevented instead of giving highly complex and abstract definitions of service or selling this book redefines service and selling with say yes to customers and make customers say yes respectively insisting that customers satisfaction with service will naturally lead to their long term loyalty this book emphasizes that customers satisfaction with service has a shelf lifetime which will soon fade over time taking the achievement of customer satisfaction as the final purpose of service the author believes that the end of service is not customer satisfaction but to create new customer needs and achieve increased sales taking meeting or exceeding customer expectations as the golden rule the author insists that customer expectations need to be reduced first then satisfied and upgraded finally focusing on the development of customers buying needs like other books do this book focuses oppositely on the research of why customers have no buying needs
