in our modern information societies we not only use and welcome computers we are highly dependent upon them there is a downside of this kind of progress however computers are not 100 reliable they are insecure they are vulnerable to attackers they can either be attacked directly to disrupt their services or they can be abused in clever ways to do the bidding of an attacker as a dysfunctional user decision makers and experts alike always struggle with the amount of interdisciplinary knowledge needed to understand the nuts and bolts of modern information societies and their relation to security the implications of technological or political progress or the lack thereof this holds in particular for new challenges to come these are harder to understand and to categorize their development is difficult to predict to mitigate this problem and to enable more foresight the secure information society provides an interdisciplinary spotlight onto some new and unfolding aspects of the uneasy relationship between information technology and information society to aid the dialogue not only in its current and ongoing struggle but to anticipate the future in time and prepare perspectives for the challenges ahead

our most basic relationship with the world is one of technological mediation nowadays our available tools are digital and increasingly what counts in economic social and cultural life is what can be digitally stored distributed replayed augmented and switched yet the digital remains very much materially configured and though it now permeates nearly all human life it has not eclipsed all older technologies this handbook is grounded in an understanding that our technologically mediated condition is a condition of organization it maps and theorizes the largely uncharted territory of media technology and organization studies written by scholars of organization and theorists of media and technology the chapters focus on specific and specifically mediating objects that shape the practices processes and effects of organization it is in this spirit that each chapter focuses on a specific technological object such as the battery clock high heels container or smartphone asking the question how does this object or process organize in staying with the object the chapters remain committed to the everyday empirical

world rather than being confined to established disciplinary concerns and theoretical developments as the first sustained and systematic interrogation of the relation between technologies media and organization this handbook consolidates deepens and further develops the empirics and concepts required to make sense of the material forces of organization
